

Making a Referral

Notice

Something seems different? Changes in behaviour, mood, attendance, friendships, appearance or engagement may indicate substance use.

Check In

Start a conversation. Be open, curious and non-judgemental. Listen to understand, ask questions and provide immediate harm reduction advice where needed.

Screen

If unsure whether a referral is needed, use the CRAFFT screening tool to explore concerns, identify risks and help determine whether specialist support may be beneficial.

Refer

Submit a referral or arrange a pre-engagement/Informed Choices session if the young person isn't ready for formal support allowing them to meet a worker, ask questions and learn more about the support available.
